A WORD FROM SKYLIGHT...

EMOTIONAL VS. STRATEGIC DECISIONS

INFORMATION VS. INSTINCT.

When it comes to investing, many people believe they have a “knack” for choosing good investments. But what exactly is that “knack” based on? The fact is, the choices we make with our assets can be strongly influenced by factors, many of them emotional, that we may not even be aware of.

INVESTING INVOLVES RISKS.

Remember that Investment decisions should be based on your own goals, time horizon, and risk tolerance. The return and principal value of investments will fluctuate as market conditions change. When sold, investments may be worth more or less than their original cost.

DEAL DU JOUR.

You’ve heard the whispers, the “next greatest thing” is out there, and you can get on board, but only if you hurry. Sound familiar? The prospect of being on the ground floor of the next big thing can be thrilling. But while there really are great new opportunities out there once in a while, those “hot new investments” can often go south quickly. Jumping on board without all the information can be a mistake. A disciplined investor may turn away from spur-of-the-moment trends and seek out solid, proven investments with consistent returns.

RISKY BUSINESS.

Many people claim not to be risk-takers, but that isn’t always the case. Most disciplined investors aren’t reluctant to take a risk. But they will attempt to manage losses. By keeping your final goals in mind as you weigh both the potential gain and potential loss, you may be able to better assess what risks you are prepared to take.

YOU CAN’T ALWAYS KNOW WHAT’S COMING.

Some investors attempt to predict the future based on the past. As we all know, just because a stock rose yesterday, that doesn’t mean it will rise again today. In fact, performance does not guarantee future results.

THE GUT-DRIVEN INVESTOR.

Some investors tend to pull out of investments the moment they lose money, then invest again once they feel “driven” to do so. While they may do some research, they are ultimately acting on impulse. This method of investing may result in losses.

ELIMINATING EMOTION.

Many investors “stir up” their investments when major events happen, including births, marriages, or deaths. They seem to get a renewed interest in their stocks and/or begin to second-guess the effectiveness of their long-term strategies. A financial professional can help you focus on your long-term objectives and may help you manage being influenced by short-term whims.
